

Further related terms and conditions for Max Planck authors (without central funding)

The following table shows conditions and available discounts for Max Planck authors beyond our central agreements.

PUBLISHER	ENTITLED AUTHORS / CONDITIONS
AAAS / Science	Corresponding author - All Max Planck corresponding authors may receive institutional savings of up to 30% on APCs for Science Advances because Max Planck Society subscribes to the Complete Science Collection. AAAS members are entitled to receive additional savings - no central payment by MPDL.
American Chemical Society (ACS)	All Max Planck authors can claim the status of an "All ACS Publications" subscribing institution when they want to make use of ACS' Open Access options - no central payment by MPDL. Note that ACS requires additional fees for Creative Commons Licenses.
Electrochemical Society (ECS)	Corresponding author - All Max Planck corresponding authors are eligible to use the ECS Plus Open Access option without payment of article charges (due to our subscription agreement).
IOS Press	Corresponding author - All Max Planck corresponding authors receive a 50% discount for article charges for IOS Press' Open Access option - no central payment by MPDL.
Karger / Karger Open Access journals	All Max Planck authors are granted a 50% discount on the article processing charges for all genuine Open Access journals - no central payment by MPDL.
National Academy of Sciences / Proceedings of the National Academy of Sciences USA (PNAS)	Corresponding author - All Max Planck corresponding authors receive a discount for the open access surcharge (\$1,100 instead of \$1,450) - no central payment by MPDL.
Sage / Sage Pure Gold Open Access Journals	All Max Planck authors are eligible to claim reduced prices for the following journals: SAGE Open = 59 GBP, SAGE Open Engineering = 298 GBP, SAGE Open Medicine = 358 GBP, SAGE Open Medicine Case Reports = 268 GBP - no central payment by MPDL

Any journal or publisher missing?

In case you are in need of funding for open access publication charges for a specific journal or publisher, please contact us. We strive for further agreements with publishers where we see a shared demand from Max Planck authors. Please note that we cannot reimburse individual invoices. In that case, your institute or local library may provide further funding opportunities.

MPDL Fact Sheets on Open Science

August 2018

MPDL Institutional Funding for Open Access Publications

Our aim is to make Open Access publishing as easy as possible for Max Planck authors. This information provides an overview of the Max Planck wide arrangements by which open access article charges (APCs) are covered or reduced. You can also search for a specific journal to find out whether APCs are covered here:

<https://rena.mpdl.mpg.de/journals/oagold/>

In order to benefit from central funding, the corresponding author of the publication must be affiliated with Max Planck and this affiliation must be stated in the published paper. Furthermore, it is absolutely necessary to state your Max Planck email address at any stage of the publishing process as well as in the manuscript itself.

This information will be constantly updated on our website at <http://bit.ly/1p1t4GS>.
